

Keeping your life insurance active

Stay protected. Keep life insurance active by electing **CONVERSION** or **PORTABILITY**

When eligibility for coverage ends under the group contract, an insured may have the following two options to continue coverage without providing evidence of insurability (documentation of health history):

Conversion: An employee’s Group Term Life Insurance is converted to an individual permanent Universal Life insurance policy that can build cash value over time.

Portability: An employee’s Group Term Life Insurance is continued through a separate group plan. Accidental Death and Dismemberment (AD&D) coverage can also be ported alongside your Life coverage. AD&D coverage is an added rider attached to your existing basic life policy that will pay an additional benefit to the beneficiary if the cause of death is an accident, or there is loss of use of specific body parts due to an accident. Portability (port) is a less expensive alternate to conversion.

Employees may be eligible to convert or port Basic Life, Optional Life, and Dependent Life coverage. Certain limits and restrictions apply to Retiree Life coverage; therefore, please refer to the comparison chart below for additional information regarding eligibility.
