

Why did I receive the letter from Excellus? Is it legit?

Yes, the information in the letter is legit. You have received this letter because you or someone on your health plan has been identified by Excellus as using specialty pharmacy medications.

What is SaveOnSP?

SaveOnSP is a specialty pharmacy drug program managed by Accredo Specialty Pharmacy. This company is used by Excellus with employers that have self-funded health plans to reduce prescription copayments and allow the MCC health plan to purchase specialty medications at a reduced cost without needing to change the medication that you are currently taking. With this program, the MCC health plan is able to receive a lower cost for the specialty medication and is able to lower your individual copay.

Will my medication change?

No. The program will not change your medication. The specialty list of medications that qualify are all considered as specialty medicines with no alternatives available. SaveOnSP works directly with the drug manufacturer's discount program to obtain the prescription and discounts for you and the MCC health plan.

What will my copay be under the SaveOnSP program?

Your specialty medication(s) has been identified with a 30% coinsurance. By enrolling in the available manufacturer assistance program and consenting to SaveOnSP monitoring your pharmacy account, your final cost will be as low as \$0.

How will I receive my medication?

Accredo Specialty Pharmacy is exclusively a delivery specialty pharmacy. Every drug eligible for the SaveOnSP program must be eligible to send via mail.

When am I eligible for the SaveOnSP program?

With your enrollment to the SaveOnSP program, you can receive your specialty medication(s) as early as January 1st, 2023.

Is this mandatory?

Yes, all qualifying medications will be filled directly through the Accredo Specialty Pharmacy. It is the only way for you to receive the reduced copayment.

How do I sign up?

Contact SaveOnSP at 1-800-683-1074:

Monday through Thursday from 8 a.m. to 11 p.m. Eastern time
